SITUATION SUMMARY

2017 February Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- Nacimiento-Ferguson Road is now opened to the public.
- A southern detour route is open to local traffic only.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

WEATHER OF CONCERN

Weather of Concern

- A Pacific storm will bring breezy wind, valley rain, mountain snow and possible small hail to portions of Northern and Central California.
 - Gusty winds up to 55 mph in the valleys and greater than 80 mph along the Sierra ridges can be anticipated through early Thursday.
- **Active Weather Warnings, Watches and Advisories by County:**
- http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php - Temporarily unavailable.
- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

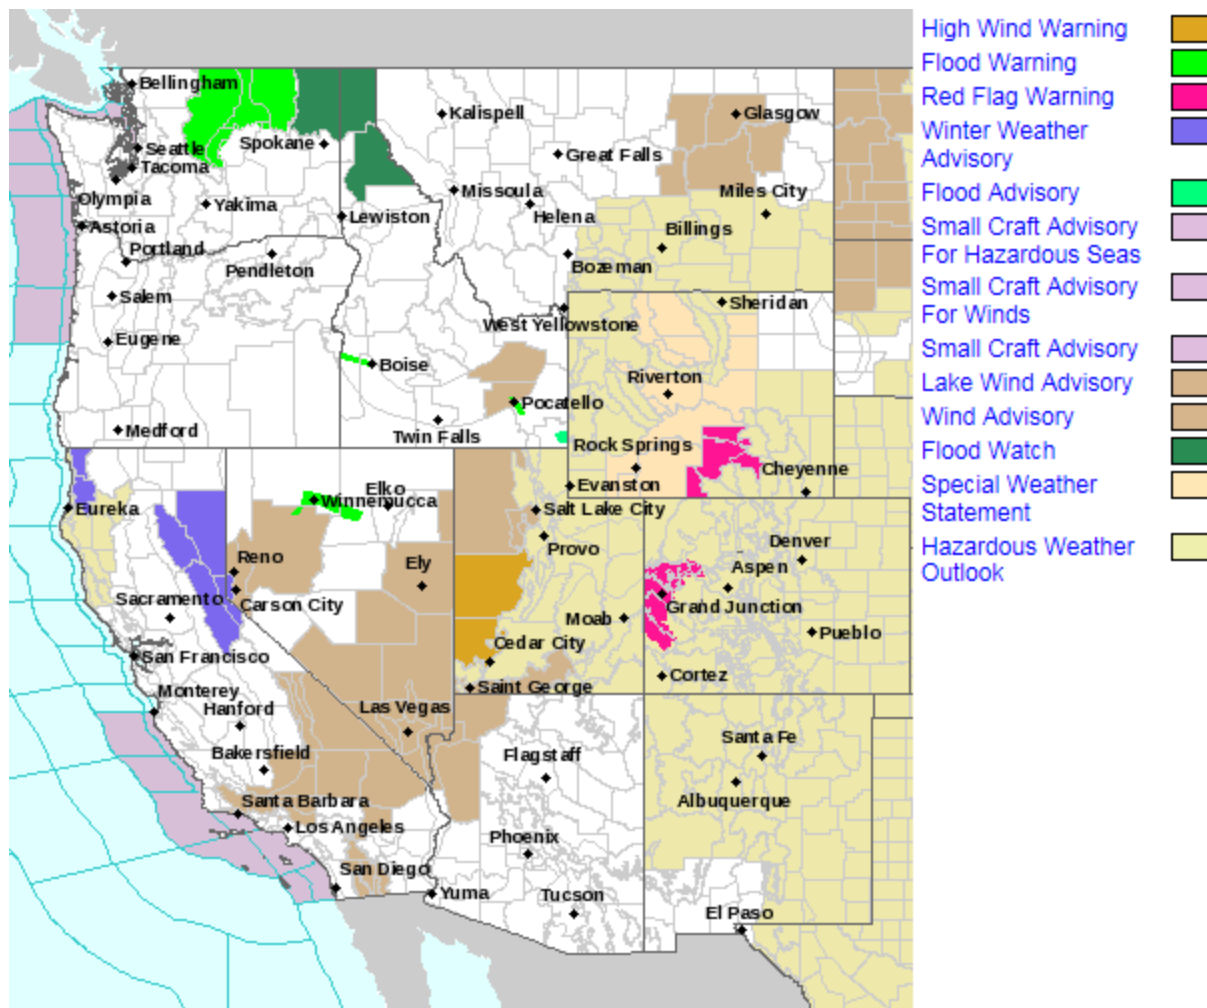

Precipitation from a wet weather system will be showery today, especially in the northern and eastern areas. A few thunderstorms will also be possible today. Showers will continue to hang around in the far northern areas Friday. Friday night through Sunday morning looks dry, but not necessarily cloud-free across the region. Sunday afternoon a small weather system will arrive just off the Bay Area coast and spread some light rain northward across the region. With no break between systems, another wetter system is expected Monday. Snow levels later Wednesday are likely to drop to 3500-4000 ft in the NW and 6500-7000 ft over the Sierra. There will be periods of moderately strong, gusty southerly winds accompany the approach of the weather systems this week with sustained speeds mostly 12-22 mph and strongest gusts of 30-40 mph. Temperatures will also be 5-12 degrees below normal for the next 3 days.

SOUTHERN CALIFORNIA

A Pacific trough over the West Coast will bring scattered showers to Central California with less than a quarter inch of rainfall through this afternoon. The snow level will be between 7,000 and 8,000 feet. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas through tonight. Temperatures will be around 5 degrees below normal today, with 40s to low 50s across the mountains and 60s to low 70s in the valleys. Temperatures will warm and humidity will lower Friday and Saturday as a weak ridge of high pressure builds into California from the southwest. Temperatures will rise back into the lower 80s across the warmer valley locations on Saturday. A series of Pacific troughs will move into the West Coast bringing a cooling trend to the region Sunday through the middle of next week. These troughs will also bring scattered showers with light rainfall totals to Central California starting Sunday afternoon. Strong and gusty westerly winds will surface across the mountains and deserts Sunday through the middle of next week.

OF EMERGENCY SERVICES

Cal OES LAW ENFORCEMENT MISSIONS

New/Ongoing Cal OES Missions

- **2017-LAW-35189, 4/12/17 @ 0955 hours:** Butte County Sheriff requested an Human Remains Detention dog to search a vehicle for indications that the vehicle was used to transport a deceased body. This is not an allowable use of Search and Rescue dogs, but was referred to Santa Clara Sheriff's Office, who has Law Enforcement evidence dogs. Santa Clara agreed to accept mission. Mission tentatively planned for Saturday 4/15. Further details restricted as Law Enforcement sensitive in regards to an active criminal investigation. **Mission On Going**

Closed Cal OES Missions

- **2017-LAW-35129, 4/9/17 @ 1828 hours:** (Reopened) AFRCC reported a PLB activation at 37° 18.33' by -121° 51.13' which plotted to a parking lot in San Jose Ca. The registration information for the device was out of date and none of the emergency contact numbers were valid. AFRCC requested that local police check the area. I called San Jose Police and made the request. They checked the parking lot and found a flea market with about 1,000 people selling various items. They checked with security at the event but no problems were reported. AFRCC advised. AFRCC did not request anything additional at this time, but did indicate that additional follow up would be needed if the device continued to broadcast a distress signal. **Update: 4/11/17 @ 1500 hours:** AFRCC reports that the device is back in distress mode. It was plotted at four separate locations in Oakland. The most recent location is 37° 45.8' by -122° 11.6', which plots to near 1440 65th St in Oakland. AFRCC will continue to monitor and advise if further action is needed **Update: 4/11/17 @ 1800 hours,** AFRCC is reporting the PLB is still activating with updated coordinates: 37° 45.60' by -122° 12.73' PLB is in the area of Oakport St. in Oakland. Since the device has continued to activate over the last 4 days, LDO and AFRCC agreed to launch a CAP (Civil Air Patrol) mission to located and silence the device. **Update 4/12/17 @0600 hours,** CAP was unable to located the device last night. There are no new coordinates and the device continues to sound in a very populated area in Oakland. CAP will attempt to located and silence today. **Update 4/12/17 @ 1700 hours:** Civil Air Patrol deployed but were unable to locate the PLB, which has stopped transmitting. CAP demobilized and AFRCC has closed the mission. **Mission Closed**

Cal OES MISSIONS

Cal OES Missions

- **2016-IREOC-21748:** Tasking Caltrans to extend state highway right of way to facilitate hazard tree removal. This is a long term mission and is expected to remain in place through the summer months. **Mission Ongoing.**
- **2015-IREOC-19846:** One RAWS weather station to Amador OA – On scene 11/30/15, expected to be left in place until May 2017. **Mission Ongoing.**
